

# Probiotic Laundry Liquid

High performance probiotic  
laundry liquid

Treats septic systems and  
reed beds with every wash

Excellent for greywater and  
recycled water systems

Control mold, mildew, odours  
and pathogens

Continuous deep cleaning,  
odour control and fabric  
freshness

## Product Description:

Ecozyme Probiotic Laundry Liquid is a natural plant and microbe based high performance laundry liquid.

Instead of being just eco-friendly and biodegradable, it actively benefits septic systems, reed beds, wastewater plants, greywater and recycled water systems with every load of washing done.

Control and eliminate laundry mold, mildew, and pathogens and washing machine odours through the scientific process of Competitive Exclusion.

Probiotic Laundry Liquid works during the washing cycle, and deep cleans for days to weeks afterwards to keep laundry free of odours, fabrics feeling fresh while increasing their durability.

### Product Features:

- Eco-friendly
- Mild fabric softening effect
- High performance
- Economical
- Benefits all waste systems
- Control mold, mildew and pathogens
- Keep washing machines free of odours
- Excellent stain removal properties
- Gentler on the skin
- Phosphate free
- Non-volatile, non-corrosive, non-toxic
- Suitable for hard water environments
- Natural plant-based formula
- Benefits wastewater and recycling plants
- No added dyes
- Sophisticated and lingering fragrance

### Demonstrates Excellent Performance Against These Tough Stains:

- Grass, Blood, Tomato Sauce, Suntan Lotion, Gravies, Toothpaste, Red Wine, Grease, Coffee, Deodorant, Makeup, Mud, Fruit Juice and much more

### Directions & Usage (Domestic Loads):

Dose into washing machine tray.

Top Loader: Heavy soil = 110 ml.  
Medium soil = 75 ml.

Front Loader: Heavy soil = 75ml  
Medium soil = 50 ml

### Tough Stain Removal Advice:

Always pretreat stains immediately when they happen with a 3 part cold water and 1 part product mix to form a concentrated liquid which is scrubbed into the stain and allowed to stand for 1 hour. Then soak with sufficient product in very hot water overnight. Wash as normal the next day. Do not tumble dry or iron if the stain is still present. Repeat the above process.
