

Eco-Safe Spray-Buffer

Special blend of quality ingredients for use with a burnisher in buffing operations that help to maintain a top shine while extending the life of floor polish treatments.

Description:

Eco-Safe Spray-Buffer is a special blend of finest ingredient hard Wax, polymer and resins, designed for use with a burnisher in buffing operations that help to maintain a top shine while extending the life of Eco-Safe Liquid Floor Polish or Eco-Safe Mop & Shine.

Features & Benefits:

Eco-Safe Spray-Buffer is a buffing product that extends the shine-life of Eco-Safe Liquid Floor Polish when it is applied first to pre-seal the floor after cleaning.

Eco-Safe Spray-Buffer imparts a great gloss quality and helps the original floor seal to protect the floor through maintaining the integrity of the seal while promoting gloss.

Eco-Safe Spray-Buffer is easy to apply and allows for quick gloss maintenance. Eco-Safe Spray & Shine helps to hide unwanted deep scratches that the substrate may

have suffered during its time of service and allows one to extend its working life and thus prevent the need for patching and downtime on heavily tread surfaces in thoroughfares and passages.

Applications:

Eco-Safe Spray-Buffer can be applied to any floor, from masonic to various plastic finishes, including PVC and PVA Resin Flooring, either for tiles or for roll-out section floors that have been pre-sealed with Eco-Safe Liquid Floor Polish. Eco-Safe Spray-Buffer can be applied in supermarkets, kitchens, hostels, hospitals, homes and hotels with equal confidence when doing maintenance buffing using a burnishing machine.

Use & Dilutions:

GLAZING and SHINING: Eco-Safe Spray-Buffer is generally recommended for undiluted usage through a spray bottle, but in cases where buffing is done on a daily frequency like in some supermarkets and megastores every time that spillage dictates, it may be diluted before application.

Eco-Safe Spray-Buffer should not be applied too thickly as this will cause high localized build-up of the soft waxes and this may prove to be counter-productive with respect to

minimizing slipping and falling of staff and customers.

Shelf Life & Storage:

Eco-Safe Spray-Buffer may be stored for up to one year in the original packaging, and under ambient conditions. Store between 10°C - 38°C.

Physical Properties:

Physical State: Liquid
Appearance: Milky white
% Solids Content: As stated
Specific Gravity: 0,97 - 1.01 kg/cm
Solubility: Dispersable
PH Value:
Odour: Slight wood glue-ish
Boiling Point: N/A
Flash Point: N/A

Packaging:

Available in 5Kg, 25Kg & 1000 Kg flow bins
